

Guide to calculating EBF Stallion Contribution 2018 covering season

To assist stallion owners in ensuring that they are paying the correct amount to the EBF, the following guide has been drawn up.

- 1 The EBF contribution is based on the average value of nominations sold, NOT the advertised fee.
- 2 If mares have been covered but no nominations have been sold, the minimum fee of £350/€500 (£100/€150 registration fee + £250/€350 balance) is payable.
- 3 To calculate the average value of nominations sold:
 - Total value of nominations sold on 1st October terms, multiplied by 70%

PLUS

- Total value of nominations sold on Live Foal terms (including SLF, NFNF, etc. terms) multiplied by 60%.
- Divide grand total by the number of nominations sold (**NOT** number of mares covered)

This will give the average value of nominations sold for the Standard Contribution

- If the total number of mares covered is 65 or more, use the Graduated Payment Scheme to determine the amount due to EBF:

| | |
|--------------|-----------------------------|
| 65-85 mares | x 1.5 Standard Contribution |
| 86-120 mares | x 2 Standard Contribution |
| 121+ mares | x 3 Standard Contribution |

- Stallions covering 10 mares or fewer, and whose average value of nominations sold is under £2,000/€2,500, will pay the minimum fee of £350/€500.

If you require any assistance in calculating the amount due for your stallion, please contact this office on **01638 667960** or email **info@ebfhorseracing.co.uk**
